Profile

M.S. candidate in Chemical Engineering at NTUST, specializing in **electrochemistry, ultra-low-temperature electrolytes** and **lithium battery reliability / aging**; co-author on a **Nature Materials** submission.

Research & Industry

Long-Life Li Battery Evaluation for Smart Water Meters

Partner: a smart-water-meter battery maker **Project lead**

Screening methodology
Designed full-stage test protocols, experimental workflows and statistical validation models.

Advanced analysis
EIS, OCV drip, self-discharge / lifetime estimation, accelerated aging and X-ray CT internal structure analysis.

Database & SOP
Established the test database and standardized high-throughput screening procedures (SOP).

Training & tech transfer
Trained QA and R&D teams to independently run large-batch screening and data interpretation.

Nature Materials Journal submission — battery thermal stability study Status Under review

Co-author Responsible for TGA thermal measurement

Performed TGA sample preparation, measurement setup and data interpretation for battery material samples, providing thermal stability data supporting the manuscript's conclusions.

Experience

2025 – Present — **Sustainable Electrochemical Energy Development (SEED) Center, NTUST**

Lab Equipment Procurement & Asset Maintenance Manager

- **Procurement (>NTD 2M):** Led procurement of glovebox O_2 sensors, a DSC press set with annual maintenance contract, a hydraulic electrode punch, vacuum pumps, 10 Eppendorf pipettes, low-temperature baths and TGA platinum pans; also replace instrument consumables.
- **Lab safety:** monitor glovebox O_2 / moisture levels and handle sensor faults; manage and inspect gas cylinders, run lab safety walk-throughs and brief newcomers on safety; helped with on-site response to incidents such as a cut from broken glassware and a glovebox catalyst-canister leak.
- **Hazardous materials:** handle lithium metal and assemble coin cells in a glovebox, prepare ether / carbonate organic-solvent electrolytes, and dismantle and handle faulty Li–$SOCl_2$ cells.
- Assembled cells and prepared electrodes in a battery dry room, working in cleanroom garments under clean-area gowning and entry procedures.
- **TGA testing service:** Ran TGA measurements and data interpretation for graduate students from 6 labs across Chemical, Mechanical and Materials Engineering at NTUST — over 600 samples in total, including my own lab's.
- **Instrument maintenance:** Responsible for maintenance and calibration of the key thermal analysis instruments, TGA Q500 and DSC 2500.

Summer 2022 — **New Taipei City Dept. of Urban Development**

Summer Intern, Housing Development Section

- Reviewed rental subsidy eligibility, cross-checking property, income, and insurance records across agencies (tax bureau, land registry, NHI); handled frontline public inquiries and disputes.

2021 – 2024 — **Tunghai University Student Housing / GEPT**

Resident Assistant (2 yrs) / Exam Staff (part-time)

- Oversaw safety and order in a 100-resident dormitory, mediating disputes and tracking facility safety issues with the dorm supervisor; as part-time exam staff, handled test-paper check-in with zero errors.
